

## FLOOD HAZARD CLASSIFICATION REQUEST

Requested by: \_\_\_\_\_ Phone: \_\_\_\_\_

Address to be classified: \_\_\_\_\_

**\* THIS IS NOT A CERTIFICATION OF CLASSIFICATION OR ELEVATION \***

A review of the **Flood Insurance Rate Map #17031C - effective date: August 19, 2008** - including the following panel numbers: **0179, 0181, 0182, 0183, 0184, 0191, 0192 and 0211 J.**

- The subject property is clearly within an "A" zone.
- The subject property is clearly within an "AE" zone.
- The subject property is clearly within an "X" zone.
- The subject property is clearly within a shaded "X" zone.
- The subject property is within an area that cannot be classified without elevation information. \*

**\* Because the map scale is 1 inch = 500 feet there is extreme difficulty in determining a property's location when it is near the edge of various zones. For this reason elevation information is necessary.**

Prepared by: \_\_\_\_\_

If you wish the Community Development Department of the City of Rolling Meadows to classify the property you must provide a plat of survey with ground surface elevations and lowest habitable floor elevations in National Geodetic Vertical Datum of 1929 (NGVD). The elevations are to be prepared and certified by an Illinois Registered Professional Engineer, Illinois Registered Land Surveyor or Illinois Registered Architect.

*Please allow one (1) week for the preparation of the certification by the Community Development Department.*
